

HOME OWNER WARRANTY

YORKVILLE

CLASSICALLY INSPIRED ROWHOMES

At the Platinum Group of Companies we're passionate about excellence and demand the very best. We have a steadfast commitment to constructing superior quality homes with exemplary finishes, and we refuse to accept anything less!

Warranties and guarantees should not be based solely on our strong reputation as a builder.

We are a registered builder with the Homeowner Protection Office (HPO) and have third party coverage with National Home Warranty. Your warranty includes: one year warranty against defects in material and labour, two year warranty against the major systems in your home, the exterior cladding and the Building Code, five year warranty against building envelope defects, and ten year warranty against structural defects.

At the Platinum Group of Companies we use experienced engineers to ensure the highest building standards and take advantage of Rain Screen Technology to protect your home from the elements. This technology involves creating a protective barrier between the interior and exterior walls. It is essentially a built-in gap or cavity between the cladding of a building and the building paper layer. This gap allows water that may get beyond the cladding to 'escape' so that it does not seep through to the sheathing or framing where long term damage could occur.
